

**NEW PRODUCT!**

# QuickBooks® Point of Sale Solution for Retailers

## The Complete Point of Sale Solution for Your PC.

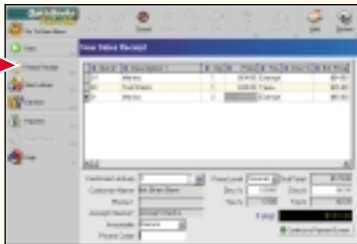

### Ring Up Sales

- Use your existing computer and keyboard to ring up cash, check and credit card transactions like a cash register.
- Like a cash register, your computer opens the cash drawer with each sale and prints a receipt.

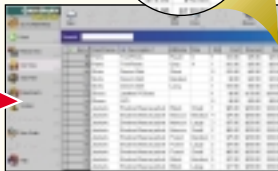

### Store Sales Information

- QuickBooks Point of Sale captures and stores information from each sale as it is completed.
- Track inventory, look at customer purchase information or quickly run up-to-the-minute sales reports.

### Track Inventory

- Always know what inventory you have on-hand, without conducting a physical count.
- Inventory totals automatically adjust as you sell items or purchase stock.
- Locate an item, check if it is in stock or look up the price. QuickBooks Point of Sale can sort inventory items by department, item number or other descriptions you use.
- Use a bar code scanner to scan items when ringing up sales or entering new inventory.
